MATERIALS

All our plants and trees are of exceptional quality and look very natural.

We work with synthetics that are mainly manufactured from natural materials such as viscose and cellulose (also called artificial silk).

We also use eco-friendly plastics and natural materials such as (reclaimed) wood to produce our plants.

Some of our range comprises flame-retardant and UV-resistant artificial plants allowing the plants and trees to maintain their beautiful condition all year round.

These artificial plants are made of plastic.
We strive for sustainable plastic solutions that reduce our carbon footprint, in part by using eco-friendly plastic granules during production. Our products have a very long lifecycle and are easily recyclable.

Flame retardant material, according to international standards.

These artificial plants are UV-protected to resist UV rays or sunlight and make them last longer.

A close-up photograph of a plant with numerous green, elongated, lanceolate leaves. The leaves are arranged alternately along thin, light brown stems. Some leaves show signs of aging or damage, with yellowish-brown spots and edges. The background is blurred, showing more of the same plant and some brown, textured material.
